

## ENERGY EFFICIENCY POLICY

We use our energy efficiently to protect our world from possible dangers and set goals to reduce our energy consumption.

For this;

- As Siam Elegance Hotels&Spa, we follow all standards, laws and regulations in order to fulfill our responsibilities and legal obligations to nature, carry out studies that will reduce energy use and/or continuously improve our energy consumption performance, and follow the results of our work.
- In line with our energy goals, we include energy efficiency in our training programs in order to ensure the participation of our employees.
- We care to cooperate with all our stakeholders to create common goals and results in energy management. In these matters, we try to continue our interaction with our guests, employees, visitors and all business partners in order to reach the level of awareness.
- As Siam Elegance Hotels&Spa, we research and purchase and use energy-efficient suitable product, equipment and technology alternatives.
- As Siam Elegance Hotels&Spa, we aim to document, disseminate, update, review and continuously improve our energy management system to all our departments.
- We evaluate energy risks, emergencies that may arise, and plan the precautions that can be taken.
